ADVOCACY:

- In May 2026, Patti Zettler, Nathan Cortez, and I led an effort (with Lewis Grossman and a team at Covington & Burling) to draft an amicus brief to the Supreme Court on behalf of FDA law scholars in *Danco v. Louisiana*. We later wrote one in the Fifth Circuit. This is one of the progeny cases following *Alliance*—this time with states as plaintiffs. We also filed one in the Fifth Circuit.

- In March 2024, David Cohen, Rachel Rebouche, and I helped draft and submit an amicus brief to the Supreme Court in *Moyle v. United States*—the case concerning whether federal law requires states with abortion bans to cover medically necessary abortions—arguing that *Dobbs* is unworkable and must be overturned.

- February 2023 – March 2024: Patti Zettler and I led an effort (with Lewis Grossman and a team at Covington & Burling) to draft an amicus brief, signed by a group of prominent FDA law scholars, opposing plaintiffs in the *Alliance for Hippocratic Medicine v. FDA* case. There, the plaintiffs are challenging the FDA's regulation of mifepristone (the first drug in the medication abortion regimen). We also drafted and filed an amicus brief before the Supreme Court and the Fifth Circuit in the same case. In October, the group drafted and filed another brief to the Supreme Court, this time supporting the FDA's petition for certiorari. And another Supreme Court brief in January 2024 on the merits.

- In October 2023, I helped organize and draft a comment letter to the EEOC regarding its Notice of Proposed Rulemaking interpreting the Pregnant Workers Fairness Act to include protections for people who have abortions. The small group of law professors who helped draft the letter argue that the EEOC's proposed interpretation is not subject to the major question doctrine.

- March 2023: I worked with health law scholars and lawyers from Covington & Burling to draft an amicus brief in support of the plaintiffs in *GenBioPro v. Sorsaia*. There, plaintiffs are seeking a court order that the FDA's regulation of mifepristone preempts state abortion bans, prohibiting them from banning medication abortion. Our brief was cited in the district court's opinion.

- 2022-2023: David Cohen, Rachel Rebouché, and I worked with legislators in Connecticut to draft the first law in the country that would shield abortion providers from extraterritorial lawsuits related to abortion. We submitted written testimony in support of the law, and Cohen testified orally. This law has now been replicated and passed in many other states and formed the basis of many executive orders. I also helped draft the first city shield law in Pittsburgh and testified on its behalf before city council. This law is now being passed both other cities in Pennsylvania.

- October 4, 2022: Elizabeth Janiak and I drafted of a citizen petition to FDA on behalf of nearly fifty medical and advocacy organizations, asking the agency to work with the mifepristone drug sponsor to add miscarriage management to the drug's label, to remove the Risk Evaluation and Mitigation Strategy (REMS), and to use its enforcement discretion to not enforce the REMS for that indication.

- October 11, 2022: David Cohen, Rachel Rebouché, and I submitted a comment to the Department of Veterans Affairs in response to its Interim Final Rule covering abortion care in the context of rape, incest, life, and health, even in states that ban abortion, supporting its position that the Interim Rule preempts state abortion bans with narrower exceptions and regardless, the intergovernmental immunity doctrine prohibits the state from regulating federal workers.
